NIEPA FACULTY

National Institute of Educational Planning and Administration (NIEPA)
(Deemed to be University)

ABOUT THE UNIVERSITY

The National Institute of Educational Planning and Administration (NIEPA), a deemed to be university, is a premier institution and has been functioning as a think tank in the field of educational policy and planning in India for more than half a century. The Institute carries out research, offers study programmes at the doctoral level, organises capacity development programmes for educational planners and administrators, and extends policy support to decision making bodies. It is an autonomous university funded by the Ministry of Education (MoE), Government of India.

The university witnessed several phases of transformation in its nearly six decades of existence. NIEPA's origin can be traced back to 1962 when it was established as the UNESCO Regional Centre for the Training of Educational Planners and Administrators for the Asian region. It was renamed the Asian Institute of Educational Planning and Administration in 1965. It became the National Staff College for Educational Planners and Administrators in 1973 and it was further renamed as NIEPA in 1979 when research was added as a major focus of its activities. It became a university in 2006 under the new name – National University of Educational Planning and Administration (NUEPA), offering research study programmes and awarding MPhil and doctoral degrees. It regained its name NIEPA in 2017.

The transformation of the university from its initial stages reflects the changing orientation and ownership of the institution. While it remained a regional institution with support from international organisations in its first decade of existence, it became a national institution and later a national university funded by the government of India. It was established as a training institute with the core mandate to train educational administrators in the region and country. Research was added as another major function of the institute when it became NIEPA and teaching became one of its core function when it became a university in 2006. Today NIEPA is a unique university with broader mandate in research, teaching and capacity development, and playing a lead role in policy, planning and management of education in India.
