

Department of ICT

National Institute of Educational Planning and Administration, New Delhi

Invites you to Webinar

on

“Use of Technology in Education: Challenges and Prospects”

August 24, 2021 (Tuesday) || 3 PM – 4 PM (IST)

The National Institute of Educational Planning and Administration, New Delhi is conducting a series of theme-based webinars on New Educational Policy (NEP) 2020 following the completion of one year of its launch. The Department of ICT is organising a webinar on **“Use of Technology in Education: Challenges and Prospects”** on **August 24, 2021 at 3 PM – 4 PM**. The idea of this webinar is to understand the use of technology in Education: Issues and Challenges as per the vision of the NEP 2020.

India is a global leader in ICT and in other cutting-edge domains, such as space. Relationship between technology and education at all levels is bi-directional. Technology affects the way individuals communicate, learn, and think. It helps society and determines how people interact with each other on a daily basis. Technology plays an important role in society today. It has positive and negative effects on the world and it impacts daily lives. The NEP 2020 envisages extensive use of technology in teaching and learning, removing language barriers, increasing access for Divyang students, and educational planning and management. The New Education Policy (NEP) 2020 has also given increased focus on the use and integration of technology for professional education. The policy stresses the Digital India Campaign that is helping to transform the entire nation into a digitally empowered society and knowledge economy. With the help of technology platforms, the policy states that technological advancements will be practised at all levels of education to develop classroom methods, support teachers' professional development, enhance educational access for all group and administrative management.
